

Friday, 6th March - h 14:00
Seminars room, NICO

Genes, Mothers and Gender

The "fatal" interaction that modulates behaviour and metabolism - the model of NPY1r KO conditional mice

Paola Palanza

Università di Parma, Dipartimento di Neuroscienze
Unità di Biologia del Comportamento

Paola Palanza's research activity focuses on the biological basis and adaptive significance of behaviour, with particular regard to the role of sex differences and developmental events.

Host:
Annalisa Buffo
